ACCESSORIES

[TRIPLE TRANSDUCER CONNECT \(TTC\)](#) — Connecting up to three different transducers, side-by-side, plugged in, and ready to scan.

[POWERPACK](#) — Extended battery pack

[POWERPARK](#) — Dedicated charging station

IMAGE QUALITY - THERE IS A DIFFERENCE

When it comes to differentiating image quality, the M-Turbo is unique on many levels. The fine detail and subtle tissue delineation come from the advanced image processing software unique to the M-Turbo. It is one thing for an imaging specialist to get a great image from an ultrasound, with SonoAdapt™ the M-Turbo optimizes your image for you while you scan to ensure you always get a great image.

ADVANCED NEEDLE VISUALIZATION TECHNOLOGY

SonoSite's Mbe Advanced Needle Visualization technology provides needle illumination to assist with all ultrasound guided needle procedures, especially during steep-angled procedures.

POWERPARK — Offering true mobility to any point-of-care location around the hospital or office, the PowerPark accessory is a cordless charging station for SonoSite ultrasound systems mounted on a SonoSite Universal Stand.

- Eliminate the hassle of bending over and plugging the system into the wall
- Park your system in a convenient, central location
- Keep the system fully charged to increase workflow, efficiency, and maintain optimum battery life

Stop searching for outlets or worrying about battery life and start spending time and energy focusing on your patients.
